

VALVCHEQ BACKFLOW PREVENTERS TEST KIT

Professional quality backflow test kit suitable for all brands of testable backflow prevention devices

FEATURES

- Large easy to read gauge.
- Brass soft seated valves.
- Generous hose lengths with swivel couplings for convenient field testing.
- O-ring type test nipples allows hand tightening and no thread tape required.
- Supplied with certificate of calibration valid for 12 months from the date of purchase.
- Suitable for differential pressures up to 100 kPa.
- Gauge accuracy of $\pm 2\%$.
- Durable carry case.
- Secondary gauge to measure inlet mains pressure value.

GENERAL APPLICATION

Current legislation (AS/NZ 3500) requires that all backflow prevention devices be tested no less than once per year.

This can now be a fast and simple procedure with the ValvCheQ test kit. It comes with everything a licenced testor could need.

TECHNICAL DATA

100mm diameter face primary gauge.

Dial increments at 2 kPa intervals.

Working pressure: PN20

Temperature rating: 90°C

Hose connection flared 1/4" female.

50mm diameter face secondary gauge.
