

BioElectrolyte Cleaner™

Industrial Descaler with Acid Replacement Technology

BENEFITS:

- High-foaming
- Freeze-thaw stable
- Works fast without causing corrosion
- Dissolves water scale, lime, mud, rust, plaster, casting, and other deposits
- 5-year shelf life – will not deteriorate, oxidize or change in appearance or effectiveness
- Environmentally responsible:
 - Low pH
 - USDA A3
 - Non-fuming
 - Biodegradable
 - Non-flammable

USES:

Drains
Before After

Cleaning & Descaling
Before After

Heat Exchangers & Cooling Towers
Before After

Safe on concrete, tile, grout, fiberglass, fabric, copper, rubber, fiber, vinyl, plastic, steel, titanium, iron, brick, porcelain, ceramic, and glass

Compatible with most painted surfaces (pre-testing is recommended)

BioElectrolyte Cleaner™

APPLICATIONS:

FOAM

Onto vertical surfaces such as cooling tower fill, glass, and brick to remove rust, oxidation, and water spots

SQUIRT

Onto grout lines, toilets, urinals, and sinks to remove rust stain, efflorescence, and mineral deposits

SPRAY

Onto any glass, fabric, wood, concrete, brick, plastic, and most painted surfaces for general descaling

POUR

Into drain lines to restore flow caused by build-ups of scale, plaster, hardness, and casting deposits

AUTO-DOSE

Into drain lines using the Momar Maintain-It-All™ Pump to dissolve and prevent the build-up of scale, plaster, hardness, and casting deposits

FOAM

Into drains using the Momar Freedom Foamer™ drain foamer to remove hardness, scale, plaster, casting, and deposits
